

GET READY FOR AN UNFORGETTABLE

EXPERIENCE

Eastern Finland International Summer Term

*Universities of Applied Sciences – One Network
Your Summer!*

www.efist.org

EFIST is a network of four Universities of Applied Sciences in Eastern Finland: Kymenlaakso University of Applied Sciences, Savonia University of Applied Sciences, South Karelia University of Applied Sciences and Mikkeli University of Applied Sciences. A common Summer Term from May to September will be arranged within this network.

It is an excellent opportunity for students who wish to spend either a few weeks or the whole summer studying and having fun, in the beautiful Finnish Lake District!

We offer a wide selection of courses in the fields of business, engineering, social work and culture. The courses are delivered in different towns in the region of Eastern Finland: Kouvola, Kotka, Lappeenranta, Imatra, Mikkeli, Savonlinna, Varkaus, Kuopio and Iisalmi. This provides the chance to participate in courses organized by different Universities of Applied Sciences. For more detailed information on our website

www.efist.org

WE OFFER AN EXCITING STUDY ENVIRONMENT

Summer studies provide not only an excellent opportunity to study in an intercultural environment, but also to meet people from other countries and cultures. Whether you are studying for a degree, seeking continuing professional education or simply seeking cultural growth, expand your experience, the Summer Term is open for you!

If you are travelling alone, you will quickly make friends among your classmates and during social events. Close interaction with people from different parts of the world establishes a good foundation for deeper understanding and confidence between people of different backgrounds. Come and feel the inspiring atmosphere, enjoy the long summer nights and the beauty of Finnish nature.

We are sure that you want to make most of your summer in Finland. We organize social activities during the summer, of which you will receive more detailed information upon your arrival. Although the core of the Summer Term is its students and courses, other aspects are also an important part of an exciting summer in Finland.

During your trip you will have the opportunity to explore Finland and cities in neighbouring countries, such as St. Petersburg in Russia, Tallinn in Estonia or Stockholm in Sweden.

SUMMER TERM PROGRAMME

The programme of the Summer Term consists of one, two and three week intensive modules primarily in the fields of business and engineering. In addition to these, we offer interdisciplinary modules. Lectures are delivered either in the mornings or in the afternoons.

Furthermore students complete course work through group-based assignments, case studies and laboratory work.

A good working knowledge of English is essential for all participants. Some courses have prerequisites (for more detailed information visit our web-sites). The large number of courses on offer allow you to get ahead with credits in your own field or try something new. For course descriptions and timetables check out our web-site at

www.efist.org

COME AND ENJOY THE STIMULATING STUDY EXPERIENCE

Lecturers, coming to Summer Term from all over the world, are experts in their fields. We are delighted to be able to welcome them to Finland. We are committed to ensure that students will have a stimulating study experience in all Universities of Applied Sciences and we look forward to hearing from you. We believe that you will have a rewarding and enjoyable time in Finland!
